

Converting to Windows®

Advanced preferences from CBORD are impressive tools you can use to increase patient satisfaction, while also reducing food waste and cost. Advanced preferences now include global preferences, which can be used for common preferences that can be applied to multiple patients or sections of your facility.

CBORD's Windows-based systems also give you a wide variety of meal ordering systems, such as Room Service and Bedside Menu Entry. These systems work for your facility to increase patient satisfaction and reduce food waste.

For Healthcare Facilities

The Benefits of Upgrading to Windows

Discover new and exciting system capabilities and functionality only available to our Microsoft® Windows® system clients. By upgrading your current CBORD® system from DOS to Windows, your facility will not only save valuable time training employees, but also experience better database integrity. Provide the best service to your patients, increasing satisfaction and safety. Maximize the benefits of your system investment and utilize an improved set of clinical tools needed to be competitive in today's marketplace.

Exciting New Features

CBORD's Windows-based systems offer a wide range of new tools to improve your current operations:

- Enhanced pattern fixing
- Advanced preferences
- Expanded searching capabilities
- Favorites
- Task list
- ...and much more!

Pattern fixing automatically adjusts patient meal selections to meet the meal goals for diabetic, renal, or other pattern-based diets. Discover new concepts for both removal logic and addition logic, enabling you to better implement and track system changes, as well as control modifications of food selections to meet desired pattern diets. CBORD's redesigned pattern-fixing module provides easy-to-use tools for diet order and personal patterns for patients. It also gives greater flexibility to hospitals to maintain appropriate nutrient intake levels without decreasing patient satisfaction.

Accessibility

We designed our graphical user interface (GUI) using many Microsoft standards. If you've used Windows, Word®, or Excel®, you will find the system navigation intuitive and easy to learn. Training new and existing staff is simple with CBORD's tutorials, quick guides, and online help. Each provides a distinctive and convenient method for finding the answers you need.

Room Service

Use CBORD's integrated Room Service to provide all the current patient safety checks you have in Diet Office, while providing "hotel-style" room service to your patients and guests. Many of CBORD's customers have experienced a significant increase in patient satisfaction scores after implementing Room Service.

Database, Reporting, and Search Enhancements

Imagine a single database file! CBORD's Windows-based systems utilize a single database for both the production and clinical systems. You'll reduce your data maintenance and increase your data reliability, resulting in more accurate reporting.

Benefits of Converting

- **Better IT support**
- **Advanced preferences**
- **Room Service/Bedside Menu Entry**
- **Less data maintenance time**

Converting to Windows®

Database, Reporting, and Search Enhancements (cont.)

Newly enhanced reporting capabilities utilize multiple fonts and proportional printing, making reports easier to read. Report previews offer an opportunity to review your report on the screen before sending it to the printer, saving you reams of paper. Custom report writing has also improved, and because our Windows-based products conform to Open Database Connectivity (ODBC) guidelines, you can use third-party tools such as Microsoft Query®, InfoMaker®, or Crystal Reports® to create reports and export data to a spreadsheet program simply and easily!

Improved Security Tools

CBORD understands the importance of patient information security. In accordance with HIPAA compliance regulations, our Windows-based products provide security maintenance tools to protect patient information, while permitting the appropriate access and use. Secure log-in access and security administration provide the necessary tools to ensure the right people have access to the right information.

2

Fully Integrated Add-On Modules

Switching to Windows will allow you to take advantage of a number of fully integrated add-on modules that are now available:

- Room Service and Bedside Menu Entry
- Intake Analysis
- Nutrition Screening and Assessment
- Enteral Nutrition Support

CBORD Support

CBORD offers software support twenty-four hours a day, seven days a week. This means that regardless of when you have a question, you can call the CBORD support team and receive immediate assistance.

A CBORD Briefing

The CBORD Group provides more dietary systems than any other company in the industry. The reason is simple: CBORD knows what its customers want, and delivers it. Wherever you see the CBORD logo, you can feel confident that you have the very best dietary system available.
