

## OdysseyPCS™

## Cashless Solution for Healthcare Facilities

### **Turn Your Employee ID Badge into an Employee Benefit**

Odyssey PCS™ is a powerful Microsoft® Windows®-based cashless solution that will help you increase revenue and better serve your customers. Odyssey PCS allows staff members to use their ID badges for all retail services, including cafeteria dining, vending machines, gift shops, and pharmacies, through payroll deduction or prepaid declining balance accounts.

Cashless transactions are quick to handle, resulting in faster-moving lines, and support detailed spending reports that provide much more information than cash transaction journals. This information is valuable for forecasting sales and making decisions that drive revenue.

Odyssey PCS provides the ability to electronically track sales (e.g., employee, visitor, vendor, and volunteer sales), eliminating manual, labor-intensive procedures. You can easily implement a gift card program or online vending; both programs have a strong track record of generating increased revenue! Whether you need a one-card solution for food service or a comprehensive system that brings together many unique facilities and revenue centers, Odyssey PCS is designed to support the unique requirements of retail sales within healthcare facilities.

### **How Odyssey PCS Works**

The system is made up of a database that stores patron information and system configuration details and a network of point-of-sale (POS) devices (cash registers, vending machines, etc.). When a cardholder's ID badge or gift card is used, Odyssey determines whether the debit or payroll deduction request is approved. If so, the transaction is completed and the patron account is updated. The entire transaction takes place within seconds. All payroll deduction transactions are automatically sent to your payroll system for processing. CBORD® has experience interfacing with all major payroll and human resource systems, giving us the expertise to support a smooth implementation process.

### **Additional Components**

**Account Management:** ManageMyID® is an online account management system that allows employees to view their transactions, make deposits, set up auto deposits, and report lost cards.

**Gift Cards:** Odyssey PCS supports gift card sales and accepts them for payment at all POS card reader locations. Gift cards are a great way to brand your organization, increase sales, and support seasonal promotions.

**Devices:** Many different hardware options are available, including MICROS POS terminals, Mobile MICROS, ValuePort III (a self-service add-value station and gift card dispenser), small POS terminals that can sit next to your register, vending card readers, digital display menu boards, kitchen display monitors, and more.

## Benefits

- **Increase revenue**
- **Speed up register lines**
- **Support unlimited cardholders**
- **Automate discount and voucher programs**
- **Gain insight from detailed reporting**

# OdysseyPCS™

**Vending:** Adding card readers to your existing vending machines will increase revenue and decrease cash handling.

## **Comprehensive Solutions**

CBORD provides food and nutrition management, cashless card, and integrated security solutions to more than 6,000 organizations. Our focus is on comprehensive solutions that **increase revenue, reduce costs, guard patient safety, improve patient satisfaction, and integrate systems seamlessly.**
